

UNITED STATES DISTRICT COURT  
WESTERN DISTRICT OF WASHINGTON  
AT TACOMA

AMEE WHITE, individually and on behalf  
of K.W., a minor child,

Plaintiffs,

V.

THE UNITED STATES OF AMERICA,

Defendant.

Case No. C09-5268RJB

ORDER ON PLAINTIFFS'  
MOTION TO DETERMINE  
CHOICE OF LAW AND  
MOTION FOR PARTIAL  
SUMMARY JUDGMENT

This matter comes before the Court on Plaintiffs' Motion to Determine Choice of Law (Dkt. 24) and Plaintiff's Motion for Partial Summary Judgment (Dkt. 26). The Court has considered the pleadings filed in support of and in opposition to the motions and the file herein.

## I. FACTS

Plaintiffs bring this action under the Federal Tort Claims Act (“FTCA”), 28 U.S.C. § *et seq.*, for injuries alleged to have been sustained as a result of Defendant’s doctors’ negligence.

## A. BASIC FACTS

On December 22, 2006, 21 year old Plaintiff, Aimee White, went to the Winn Army Community Hospital (“WACH”) Family Practice Clinic in Fort Stewart, Georgia. Dkt. 31, at 1. Plaintiff reported that her last menstrual period was on November 23, 2006, she had taken a home pregnancy test, and the results were positive. *Id.* A blood test was done, confirming that she was pregnant. Dkt. 31, at 22. During the December 22, 2006, visit, an ultrasound was also

1 performed. Dkt. 31, at 2. No intrauterine gestational sac was seen, but a “small amount of free  
 2 fluid [was] seen.” Dkt. 31, at 2. The radiologist opined that this “most likely represent[ed] an  
 3 early intrauterine pregnancy.” Dkt. 31, at 2.

4 On January 2, 2007, Ms. White presented at the WACH emergency room, and reported  
 5 vaginal bleeding. Dkt. 31, at 3. No bleeding was observed. Dkt. 31, at 3. A blood test was  
 6 done, and her quantitative serum bata-HCG levels were 27,305. Dkt. 31, at 19. Ms. White was  
 7 asked to follow up with her obstetrician. Dkt. 31, at 4. The emergency room doctor, Dr.  
 8 Newton’s, treatment notes report a vaginal ultrasound showed a yolk sac. Dkt. 31, at 3. The  
 9 January 2, 2007, ultrasound report, done by radiologist Sol Epstein, M.D., states only “[p]lease  
 10 see dictated report of exam #06069674.” Dkt. 31, at 9. Obstetrician, Lyndon M. Hill, M.D.,  
 11 filed a declaration on behalf of Plaintiffs. Dkt. 26-5. Dr. Hill notes that:

12 [T]he ultrasound report of January 2, 2007, was not actually transcribed until  
 13 2/5/2007, over a month later. The dictation on 1/3/07 merely states “[p]lease see  
 14 dictation report of examination number 06069674” - a reference to the  
 15 transvaginal examination of 12/22/06 that was read by Dr. Williamson. A  
 16 specific report for this examination was not written by Dr. Epstein. It is important  
 17 to note that the referenced examination on 12/22/06 did not visualize a gestational  
 18 sac within the uterus. In reviewing the images of the 1/2/07 examination, there  
 19 was a distinct difference between the two examinations. A gestational sac with a  
 20 mean diameter of 1.5 cm, consistent with a 6 week 2 day intrauterine pregnancy,  
 21 is visible on the second examination and documented in the films, but not in the  
 22 report. Furthermore, a yolk sac was noted in the gestational sac - further proof of  
 23 an intrauterine pregnancy. It is a breach in the standard of care for a provider to  
 24 fail to document the above noted significant change between the two ultrasound  
 25 examinations.

26 Dkt. 26-5, at 4. Defense expert, Mize Conner, J.D., M.D., concedes that Dr. Epstein’s January 2,  
 27 2007, radiologist’s report was “abysmal.” Dkt. 26-7, at 7.

28 On January 4, 2007, Ms. White was seen by Toni Sylvester, M.D., in obstetrics. Dkt. 31,  
 29 at 10. The pelvic examination was unremarkable. Dkt. 31, at 10. A transvaginal ultrasound was  
 30 performed, but Dr. Sylvester does not document whether or not she saw a yolk sac or gestational  
 31 sac. Dkt. 31, at 10-12. The defense expert, Mize Conner, J.D., M.D., testified that he didn’t  
 32 “think that it’s necessarily below the standard of care for an - - for an ob-gyn in the clinic, with a  
 33 portable ultrasound machine, to miss a gestational sac.” Dkt. 30-3, at 6. Ms. White’s blood test  
 34 showed her HCG level at 27,300. Dkt. 31, at 19. Plaintiff’s expert, obstetrician Richard L.  
 35 Sweet, M.D., testified that this blood specimen was drawn only 40 hours after the January 2,  
 36

1 2007, specimen, not at least 48 hours later, and accordingly “precludes any conclusion being  
2 drawn from the plateauing HCG levels.” Dkt. 26-3, at 5. Dr. Sylvester testified that she was  
3 aware that Ms. White’s vaginal bleeding had stopped, and that she was not complaining of pain  
4 or cramping. Dkt. 26-8, at 5. Dr. Sylvester testified that if she had seen an ultrasound report that  
5 showed a yolk sac on January 2, 2007, it would have made a difference because it “would have  
6 represented a change from the prior study.” Dkt. 26-8, at 4. Dr. Sylvester diagnosed Ms. White  
7 with a threatened abortion, suspected missed abortion. Dkt. 31, at 11. “A missed abortion (an  
8 embryonic pregnancy) is when the embryo or fetus has died but remains in the uterus.” Dkt. 26-  
9 3, at 6.

10 On January 5, 2007, Ms. White returned and Dr. Sylvester opined that she had a “missed  
11 abortion confirmed by falling beta quants.” Dkt. 31, at 13. Dr. Sylvester noted that she denied  
12 any vaginal bleeding or pain. Dkt. 31, at 13. Dr. Sylvester felt Ms. White expressed a “good  
13 understanding of the potential risks,” and so prescribed Misoprostol, for “medical management.”  
14 Dkt. 31, at 13. Misoprostol is given to initiate uterine contractions in order to expel the  
15 “products of conception.” Dkt. 26-3, at 6. Defense expert, Dr. Conner, opined that based on the  
16 evidence available to Dr. Sylvester, including a history of bleeding, plateauing HCG levels, and  
17 the ultrasound information at the time, it was reasonable for her to diagnose a nonviable  
18 pregnancy and prescribe medical management. Dkt. 30-2, at 2. Plaintiff’s expert, Dr. Sweet,  
19 disagrees, opining that “if the standard of care had been met by Dr. Sylvester on 1/5/2007, within  
20 a reasonable degree of medical probability, the presence of a viable pregnancy would have been  
21 recognized and misoprostol would not have been given.” Dkt. 26-3, at 10.

22 Dr. Sylvester again saw Ms. White on January 10, 2007. Dkt. 31, at 14. Ms. White  
23 reported that she was not bleeding at the time. Dkt. 31, at 14. Dr. Sylvester told Ms. White that  
24 she had a nonviable pregnancy. Dkt. 26-8, at 6. Dr. Sylvester reports that Ms. White stated that  
25 the Misoprostol “did not complete.” Dkt. 31, at 14. Dr. Sylvester discussed “surgical  
26 management” at that time. Dkt. 31, at 14. Ms. White was reported to agree, and a dilation and  
27 curettage (“D&C”) was scheduled later in the month so that family members could come and  
28 help with Ms. White’s other children. Dkt. 31, at 14. The record does not contain any evidence

1 of the performance of an ultrasound or pelvic examination at this visit. There is no evidence that  
2 her HCG levels were tested. Plaintiff's expert, Dr. Sweet, opines that "on 1/10/2007, Dr.  
3 Sylvester did not conform with the accepted standard of care by failing to assess for and/or  
4 recognize the presence of a viable pregnancy. If the accepted standard of care had been followed,  
5 repeat ultrasound and serum quantitative HCG would have been performed, and the D&C would  
6 not have been scheduled." Dkt. 26-3, at 11.

7 Dr. Sylvester performed a D&C on Ms. White on January 26, 2007. Dkt. 31, at 15. The  
8 treatment notes do not mention that an ultrasound was performed, nor were blood tests obtained.  
9 The uterus was noted to be 8 weeks in size, there was no bleeding noted prior to the procedure.  
10 Dkt. 31, at 15. Samples were sent to pathology. Dkt. 31, at 15. Pathology confirmed "chorionic  
11 villi" present, which is "consistent with products of conception." Dkt. 31, at 18. Ms. White was  
12 asked to return in two weeks for follow up, but failed to keep the appointment. Dkt. 26-8, at 10.

13 On April 3, 2007, Ms. White presented to Madigan Army Medical Center, in Washington  
14 ("Madigan"). Dkt. 31, at 24. She reported a large gush of clear fluid from her vagina the night  
15 before while traveling across country. Dkt. 31, at 24-25. Plaintiff was found to be 19 weeks  
16 pregnant. Dkt. 31, at 27. An ultrasound was performed and a little amniotic fluid was noted.  
17 Dkt. 31, at 27. A fetal heart beat was present. Dkt. 31, at 27. Dr. Tammy Mantzouris and Dr.  
18 Jodi Schultz opined that Ms. White had preterm premature ruptured membranes ("PPROM").  
19 Dkt. 31, at 27.

20 Dr. Conner, the defense expert, opines that:

21 It's not possible to say if the [D&C] was causally connected to the premature  
22 rupture of the membrane[s], as premature rupture of membranes is a complication  
23 of a pregnancy in which no surgical intervention has occurred. It is also possible  
normally to term and culminate in delivery of a normal infant.

24 Dkt. 30-2, at 2. Dr. Conner further testified that he's "not saying that it's not connected" or that  
25 "it is connected," just that, in his opinion, "it's not possible to say one way or the other." Dkt.  
26 30-3, at 16. He opines that the use of Misoprostol was not related to the premature rupture of the  
27 membranes. Dkt. 30-2, at 2. Plaintiff's expert, Dr. Sweet, opines that:

28 In actuality the D&C was more like a blind (not performed under ultrasound  
guidance, as would normally be done) large chorionic villus sampling (CV) of

1       placental tissue/extraembryonic tissue. The fetus was not removed, but large  
2       portions of placental tissue were removed. The pathology report from 1/26/2007  
3       and the ultrasound on 4/3/2007 confirms this circumstance. As a result of the  
4       invasive instrumentation of the intrauterine contents on 1/26/2007, the pregnancy  
5       was exposed to an increased risk for preterm PROM, secondary to partial  
6       disruption of the normal fusion of the amnion and chion which constitute the  
7       fetal membranes. . . . The preterm PROM was the result of the D&C performed  
8       on 1/26/2007.

9                   Dkt. 26-3, at 13.

10          Plaintiff's expert, Dr. Sweet, opined that "[a]s a result of the PPROM, Ms. White  
11       developed oligohydramnios (low amniotic fluid volume)." Dkt. 26-3, at 8. Dr. Sweet states that  
12       "[i]n the absence of an adequate amount of amniotic fluid, normal development and expansions  
13       of the fetal lungs fails to occur. . . The key period for normal lung development is between about  
14       16-25 weeks gestation when transformation of the previable lung to the potentially viable lung  
15       that can exchange gas occurs." Dkt. 26-3, at 8. He further notes that "inadequate amniotic fluid  
16       volume may result in abnormal limb development, especially contractures. . . . Other diagnosis  
17       included persistent fetal circulation and pulmonary hypertension (resolved), acidosis of newborn,  
18       hypotension, and neonatal jaundice." Dkt. 26-3, at 8.

19          K.W. was born on July 9, 2007, at around 32 weeks of gestation. Dkt. 31, at 30-33. Dr.  
20       Sweet, Plaintiff's expert, opined that the "preterm PROM and resulting oligohydramnios also  
21       caused premature delivery." Dkt. 26-3, at 14. Prior to birth, no gross structural anomalies were  
22       noted. Dkt. 31, at 31. Right after birth, K.W.'s Apgar scores were 7 and 9 at 1 and 5 minutes,  
23       respectively. Dkt. 31, at 39. K.W., however, was unable to breathe well on her own at birth, had  
24       pulmonary hypoplasia, and "contractures of her extremities." Dkt. 31, at 30-33. She was also  
25       diagnosed at birth with hypoxia, metabolic acidosis, left pneumothorax, and hypotension. Dkt.  
26       26-3, at 9, and Dkt. 31, at 33. Plaintiff's expert, Dr. Sweet, opined that:

27                   The adverse neurologic sequelae present in K.W. are the result of the hypoxia,  
28       metabolic acidosis, and hypotension that occurred in the early neonatal period as  
29       a consequence of the pulmonary hypoplasia. The pulmonary hypoplasia in turn  
30       was caused by the preterm PROM at 19 weeks gestation and the prolonged  
31       rupture of membranes and oligohydramnios present until the time of premature  
32       delivery.

33          Dkt. 26-3, at 13. K.W. remained in Madigan's Neonatal Intensive Care Unit until August 6,  
34       2007. Dkt. 31, at 30-33.

1 On November 30, 2009, K.W. was evaluated by neurologist A. Thomas Collins, M.D.  
2 Dkt. 26-9, at 2. Dr. Collins opined that K.W. has mild language delays and mild fine motor  
3 difficulties. He further opines:

4 Her intelligence was normal. Her gross motor abnormalities center around her  
5 right lower extremity orthopedic problems. [He] believes that she has a greater  
6 than 50 percent chance of having normal: social, language, fine motor and  
7 intellectual function by the time she reaches first grade. . . [He] believes that [her]  
problems were caused by pre and perinatal issues that include: [PPROM],  
oligohydramnios and secondary fetal constraint and pulmonary hypoplasia,  
placental abruption and premature delivery.

8 Dkt. 26-9, at 2.

9 **B. PENDING MOTIONS**

10 Plaintiffs now move for an order declaring that Washington law be applied in this case.  
11 Dkts. 24 and 28. Defendant opposes the motion, arguing that Georgia law applies. Dkt. 27.

12 Plaintiffs also move for partial summary judgment requesting an order finding that the  
13 government health care providers breached the standard of care and that breach caused  
14 Plaintiffs' damages. Dkt. 26. Plaintiffs also seek summary dismissal of Defendant's fourth  
15 through ninth affirmative defenses, and it's eleventh affirmative defense. Dkts. 26 and 32.  
16 Defendant opposes the motion, except does not oppose the motion regarding: (1) the standard of  
17 care pertaining to Dr. Sol Epstein's interpretation of the January 2, 2007, ultrasound, and (2)  
18 dismissal of it's seventh affirmative defense. Dkt. 30.

19 This opinion will first address the motion regarding choice of law (Dkt. 24) and then the  
20 motion for partial summary judgment (Dkt. 26).

21 **II. DISCUSSION**

22 **A. CHOICE OF LAW**

23 The FTCA makes the United States liable "for injury or loss of property, or personal  
24 injury or death caused by the negligent or wrongful act or omission of any employee of the  
25 Government while acting within the scope of his office or employment, under circumstances  
26 where the United States, if a private person, would be liable to the claimant in accordance with  
27 the law of the place where the act or omission occurred." 13 U.S.C. § 1346 (b)(1). The whole  
28 law, including the choice of law provisions, of the state where the act or omission occurred, is to

1 be applied. *Richards v. United States*, 369 U.S. 1, 8-10 (1962).

2 It is undisputed that the place where the alleged negligent “act or omission occurred” was  
 3 Georgia. Accordingly, Georgia’s choice of law provision applies. Georgia follows a choice of  
 4 law doctrine known as the *lex loci delicti* rule. *Dowis v. Mud Slingers, Inc.*, 279 Ga. 808, 816  
 5 (2005). Under the *lex loci delicti* rule, “the place of wrong, the locus delicti, is the place where  
 6 the injury sustained was suffered rather than the place where the act was committed, or, as it is  
 7 sometimes more generally put, it is the place where the last event necessary to make an actor  
 8 liable for an alleged tort takes place.” *Risdon Enterprises, Inc. v. Colemill Enterprises, Inc.*,  
 9 172 Ga.App. 902, 903 (Ga.App. 1984)(holding that South Carolina law applies to claims where  
 10 airplane crashed in South Carolina - the crash being the final event to make the defendants  
 11 liable).

12 Here, the last event necessary to make Defendant liable was when Ms. White began to  
 13 have complications due to PPROM or at the latest, K.W.’s birth. In either Washington or  
 14 Georgia, a party is not liable for negligence unless a plaintiff is damaged. It was not until  
 15 K.W.’s birth, or at least until Ms. White had complications due to PPROM, that Plaintiffs were  
 16 damaged. Plaintiff’s expert, Dr. Sweet, opined that:

17 The adverse neurologic sequelae present in K.W. are the result of the hypoxia,  
 18 metabolic acidosis, and hypotension that occurred in the early neonatal period as  
 19 a consequence of the pulmonary hypoplasia. The pulmonary hypoplasia in turn  
 20 was caused by the preterm PROM at 19 weeks gestation and the prolonged  
 21 rupture of membranes and oligohydramnios present until the time of premature  
 22 delivery.

23 Dkt. 26-3, at 13. It is undisputed that all complications as a result of the PPROM, and K.W.’s  
 24 birth, occurred in Washington. Under Georgia’s choice of law rule, *lex loci delicti*, Washington  
 25 substantive law applies.

26 Defendant argues that under Georgia case law, Plaintiffs’ “medical injuries” are confined  
 27 to the date of the original negligent diagnosis or treatment. Dkt. 27, at 2-4. It cites Georgia  
 28 Court of Appeals in *Stafford-Fox v. Jenkins*, 282 Ga.App. 667, 669 (Ga.App. 2006), discussing  
 application of the Georgia statute of limitations in medical cases. Dkt. 27, at 3. That Court held:

29 This Court has consistently held that in most misdiagnosis cases, the injury begins  
 30 immediately upon the misdiagnosis due to the pain, suffering, or economic loss  
 31 sustained by the patient from the time of the misdiagnosis until the medical

1 problem is properly diagnosed and treated. The misdiagnosis itself is the injury  
2 and not the subsequent discovery of the proper diagnosis; thus, the fact that the  
3 patient did not know the medical cause of his suffering does not affect the  
applicability of OCGA § 9-3-71(a).

4 Defendant further cites *McCord v. Lee*, 286 Ga. 179, 180 (2009), affirming that “[i]n most cases  
5 of negligent treatment and in most cases of misdiagnosis, the statute of limitation for medical  
6 malpractice will begin running at the time of the treatment or misdiagnosis. That is the time that  
7 the injury generally occurs.” Defendant argues then, that the time of the “injury” here was the  
date of the misdiagnosis or negligent treatment. Dkt. 27, at 3-4.

8 Plaintiffs point out that the cases cited by Defendant relate to application of the statute of  
9 limitations and not to the choice of law doctrine. Dkt. 28. Moreover, the Georgia courts note  
10 that the injury “begins immediately upon the misdiagnosis due to the pain, suffering, or  
11 economic loss sustained by the patient.” *Stafford-Fox*, at 669. Here there is no evidence that  
12 Ms. White was in pain, was suffering or had economic loss until after she had complications  
13 resulting from the premature rupture of her membranes. It appears that she was unaware that she  
14 was still pregnant until she appeared in the emergency room at Madigan. Dkt. 31, at 24-25.  
15 Washington substantive law applies.

16 **B. SUMMARY JUDGMENT - STANDARD**

17 Summary judgment is proper only if the pleadings, depositions, answers to  
18 interrogatories, and admissions on file, together with the affidavits, if any, show that there is no  
19 genuine issue as to any material fact and the moving party is entitled to judgment as a matter of  
20 law. Fed. R. Civ. P. 56(c). The moving party is entitled to judgment as a matter of law when the  
21 nonmoving party fails to make a sufficient showing on an essential element of a claim in the case  
22 on which the nonmoving party has the burden of proof. *Celotex Corp. v. Catrett*, 477 U.S. 317,  
23 323 (1985). There is no genuine issue of fact for trial where the record, taken as a whole, could  
24 not lead a rational trier of fact to find for the non moving party. *Matsushita Elec. Indus. Co. v.*  
25 *Zenith Radio Corp.*, 475 U.S. 574, 586 (1986) (nonmoving party must present specific,  
26 significant probative evidence, not simply “some metaphysical doubt.”); *See also* Fed. R. Civ. P.  
27 56(e). Conversely, a genuine dispute over a material fact exists if there is sufficient evidence  
28 supporting the claimed factual dispute, requiring a judge or jury to resolve the differing versions

1 of the truth. *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 253 (1986); *T.W. Elec. Serv., Inc. v.*  
 2 *Pac. Elec. Contractors Ass'n*, 809 F.2d 626, 630 (9th Cir. 1987).

3 The determination of the existence of a material fact is often a close question. The court  
 4 must consider the substantive evidentiary burden that the nonmoving party must meet at trial –  
 5 e.g., a preponderance of the evidence in most civil cases. *Anderson*, 477 U.S. at 254; *T.W. Elec.*  
 6 *Serv., Inc.*, 809 F.2d at 630. The court must resolve any factual issues of controversy in favor of  
 7 the nonmoving party only when the facts specifically attested by that party contradict facts  
 8 specifically attested by the moving party. The nonmoving party may not merely state that it will  
 9 discredit the moving party's evidence at trial, in the hopes that evidence can be developed at trial  
 10 to support the claim. *T.W. Elec. Serv., Inc.*, 809 F.2d at 630 (relying on *Anderson, supra*).  
 11 Conclusory, non specific statements in affidavits are not sufficient, and missing facts will not be  
 12 presumed. *Lujan v. Nat'l Wildlife Fed'n*, 497 U.S. 871, 888-89 (1990).

13 **C. SUMMARY JUDGMENT RE: BREACHES OF THE STANDARD OF  
 CARE**

14 Under Washington law, a plaintiff alleging professional negligence against a hospital or  
 15 licensed physician must show by a preponderance of the evidence "that the defendant or  
 16 defendants failed to exercise that degree of skill, care, and learning possessed at that time by  
 17 other persons in the same profession, and that as a proximate result of such failure the plaintiff  
 18 suffered damages." RCW § 4.24.290.

19       1.     *Ultrasound Findings on January 2, 2007*

20 Plaintiffs seek an order holding that the Defendant's health care providers breached the  
 21 standard of care by failing to document the ultrasound findings on January 2, 2007. Dkt. 26, at  
 22 6. Defendant concedes that Dr. Epstein breached the standard of care in failing to document the  
 23 ultrasound findings of January 2, 2007. Dkt. 30. Plaintiffs' motion should be granted as to him.

24       2.     *Ultrasound Findings on January 4, 2007*

25 Plaintiffs seek an order holding that Dr. Sylvester, the government obstetrician, breached  
 26 the standard of care by failing to recognize the presence of the yolk sac on an ultrasound  
 27 performed two days later on January 4, 2007. Dkt. 26, at 9.

28 Plaintiff's motion on this issue should be denied. Defendant has pointed to the testimony

1 of Dr. Conner, who opined that it was not below the standard of care for an “ob-gyn in the clinic,  
 2 with a portable ultrasound machine, to miss a gestational sac.” Dkt. 30-3, at 6. Defendant has  
 3 shown that there are sufficient issues of fact to preclude summary judgment on this point.

4           3.     *Diagnosis of Missed Abortion*

5 Plaintiffs move for an order that the government providers breached the standard of care  
 6 by misdiagnosing a missed abortion. Dkt. 26, at 10.

7 Plaintiff’s motion should be denied. Defendant has shown a material issue of fact exists  
 8 by pointing to the testimony of Dr. Conner. Dr. Conner opined that, based on the evidence  
 9 available to Dr. Sylvester, including a history of bleeding, plateauing HCG levels, and the  
 10 ultrasound information at the time, it was reasonable for her to diagnose a nonviable pregnancy  
 11 and prescribe medical management. Dkt. 30-2, at 2. Moreover, he testified that it was  
 12 reasonable for her proceed with surgical management. *Id.*

13           **D.     SUMMARY JUDGMENT RE: CAUSATION**

14 Plaintiff moves for an order finding that government’s negligence in performing a D&C  
 15 on a viable pregnancy caused the PPROMS, which caused all the damages in this case. Dkt. 26,  
 16 at 11.

17 Plaintiff’s motion on the issue of causation should be denied. Defendant has pointed to  
 18 sufficient issues of fact to preclude summary judgment on this issue. Dr. Conner, the defense  
 19 expert, opines that:

20 It’s not possible to say if the [D&C] was causally connected to the premature  
 21 rupture of the membrane[s], as premature rupture of membranes is a complication  
 22 of a pregnancy in which no surgical intervention has occurred. It is also possible  
 23 for a pregnancy in which surgical intervention has occurred to proceed perfectly  
 24 normally to term and culminate in delivery of a normal infant.

25 Dkt. 30-2, at 2. Accordingly, the motion should be denied on this issue.

26           **E.     SUMMARY JUDGMENT RE: AFFIRMATIVE DEFENSES**

27 Plaintiffs seek summary dismissal of Defendant’s fourth - ninth affirmative defenses, and  
 28 its eleventh affirmative defense. Dkt. 26. Defendant concedes that its seventh affirmative  
 29 defense should be dismissed.

30           1.     *Affirmative Defense Number Four*

1       Defendant's fourth affirmative defense is: "Plaintiffs' claims are subject to the limitations  
2 of the substantive law of the State of Georgia; both statutory and common law." Dkt. 14, at 4.  
3 Plaintiff's motion to dismiss this affirmative defense should be denied as to the question of  
4 which state's choice of law governs and granted in all other respects. As above, in Section II. A.  
5 of this opinion, Georgia choice of law governs this case. Under the Georgia rule, Washington  
6 State's substantive provisions should be applied.

7           2. *Affirmative Defense Number Five*

8       Defendant's fifth affirmative defense is that: "[th]e injuries and damages alleged in  
9 Plaintiffs' Complaint were not proximately caused by or contributed to by any negligent or  
10 wrongful act or omission of any agent, employee, or representative of the United States." Dkt.  
11 14, at 4. There are issues of fact as to causation, as discussed in Section II. D. of this opinion.  
12 Plaintiff's motion to summarily dismiss Defendant's fifth cause of action should be denied.

13           3. *Affirmative Defense Numbers Six and Nine*

14       Defendant's sixth affirmative defense is: "Plaintiffs' injuries and damages, if any, were  
15 caused by their own negligent acts or omissions, wrongdoing, or failure to exercise due care on  
16 their parts;" and the ninth affirmative defense is: "Plaintiffs' claims are barred or diminished as a  
17 result of their negligent acts or omissions, wrongdoing, and failure to exercise reasonable care in  
18 mitigating their damages." Dkt. 14, at 5.

19       Plaintiffs move to dismiss these affirmative defenses, arguing that there is no evidence of  
20 negligence on their part which would have caused their injuries and damages. Dkt. 26.  
21 Defendant points to the opinion of Dr. Conner, who states in his report that: "[i]t is not  
22 necessarily below the standard of care to fail to interrupt an intrauterine pregnancy at the time of  
23 dilatation and curettage. Dr. Sylvester had no opportunity to recognize this failure since the  
24 patient failed to keep her follow-up appointment." Dkt. 30-2, at 2.

25       Plaintiffs' motion to summarily dismiss these two affirmative defenses should be granted.  
26 Defendant's expert provides no connection between Ms. White's failure to keep her appointment  
27 and injuries and damages here. Defendant does not state what care, if any, would have resulted  
28 if Ms. White had kept her appointment. Defendant's supposition, that Dr. Sylvester would have

1 realized that the D&C was incomplete at this appointment, rests on the assumption that she  
2 would have recognized a viable pregnancy at that point, and there is no evidence to support that  
3 assumption. Plaintiffs' motion to summarily dismiss Defendant's affirmative defenses six and  
4 nine should be granted.

5                  4.        *Affirmative Defense Number Eight*

6                  Defendant's eighth affirmative defense is that: "Plaintiffs' injuries and damages, if any,  
7 were caused by other preexisting or unrelated sicknesses, injuries, or other medical conditions."  
8 Dkt. 14, at 5. Plaintiffs motion to summarily dismiss this affirmative defense should be denied.  
9 As above, there are issues of fact as to the cause of Plaintiffs' injuries, precluding summary  
10 judgment on this affirmative defense.

11                5.        *Affirmative Defense Number Eleven*

12                Defendant's eleventh affirmative defense is that: "Plaintiffs' damages, if any, must be  
13 reduced by the percentage of fault this Court determines to be attributable to persons other than  
14 the United States, including but not limited to any and all rights to credit, offset, and/or  
15 contributions that the United States may have against Plaintiffs." Dkt. 14, at 5.

16                Plaintiffs' motion to summarily dismiss Defendant's eleventh affirmative defense should  
17 be denied. Plaintiffs move for dismissal of this defense arguing that the United States has not  
18 named any third parties who are potentially liable. Dkt. 26. While the United States has not  
19 named additional parties, Plaintiffs do not deny that they have received benefits from Defendant,  
20 including healthcare, etc. Defendant should not be foreclosed from asserting this defense at this  
21 time.

22                III.      **ORDER**

23                Therefore, it is hereby, **ORDERED** that:

24                • Plaintiffs' Motion to Determine Choice of Law (Dkt. 24) is **GRANTED**: Washington  
25 substantive law shall be applied to this case;

26                • Plaintiff's Motion for Partial Summary Judgment (Dkt. 26) is **GRANTED**, as to the  
27 Defendant's health care providers breach of the standard of care in failing to document  
28 the findings of the January 2, 2007, ultrasound, and as to the dismissal of Defendant's

1 affirmative defenses four, six, seven, and nine;

2 • Plaintiff's Motion for Partial Summary Judgment (Dkt. 26) is **DENIED** in all other  
3 respects;

4 The Clerk of the Court is directed to send uncertified copies of this Order to all counsel  
5 of record and to any party appearing *pro se* at said party's last known address.

6 DATED this 31<sup>st</sup> day of March, 2010.

7
